

PRODUCT TESTING IN AN INDEPENDENT LABORATORY

Did you know that product testing in an independent laboratory allows to evaluate the effects of Collup?

The mission of Colway International SA is to provide the highest quality supplements with effective action. That is why we decided to provide the evidence of the effects of our supplement bestseller, CollUp.

The main aim of the study was to confirm the effectiveness of the product on skin and hair. During the study, the testers could not take similar preparations or use other methods to improve the condition of the skin and hair. CollUp was very well tolerated by the testers.

Application and apparatus tests were carried out under the supervision of a dermatologist at the certified J.S. Hamilton Laboratory in Gdynia. 30 people, men and women aged 19 to 69 participated in the study. The average age of the respondents was 48 years. As recommended on the packaging, testers took 1 capsule daily.

Test duration: 56 days.

The opinions of users of this product have always been the most important to us. CollUp really works, so this product never needed advertising but for all those who appreciate numbers and hard facts, we have done research in an independent lab. CollUp is a great product! If you are not convinced by the opinions of users, the numbers will certainly convince you. The facts are not to be discussed.
