# NATIVE COLLAGENS

**Native Collagens are serums with a gel consistency for intensive regeneration and care of the face, neck, cleavage and the whole body.**

What is collagen? Collagen is a protein of youth, which constitutes over 30% of the mass of human proteins and as much as 70% of skin proteins. Together with elastin, it creates in the dermis an elastic mesh that gives it elasticity and firmness, binds water, lipophilic substances and determines the condition of the connective tissue, so in fact the condition of the whole organism.

Collagen production is disturbed after the age of 25, when the inevitable process of gradual collagen loss begins. After the age of 40, the decrease of collagen amount is about 1% per year.

Collagen does not fight the effects of skin aging, but strikes at their cause - collagen deficit.

Native collagens smooth and fill the skin immediately after application. The permanent rejuvenation effect is achieved after around 110 days of systematic treatment. This time is needed for the organism to physiologically replace the collagen structure in the skin.

OF INGREDIENTS OF NATURAL ORIGIN

*great power of action*

#### **GOOD NIGHT SKIN DROPS / 30 ml**

innovative serum that provides multidirectional care for the skin of the face. Night rest is the time of most effective absorption of the ingredients provided by cosmetics. We have composed a unique formula to ensure its optimum regeneration, rejuvenation and hydration. An innovative combination of active ingredients makes the product work from the first use and regular use brings a visible improvement in the condition of the skin - it has anti-wrinkle properties and reduces existing wrinkles, firms and tones the skin, evens out the colour and restores the skin's radiance and glow.

# Does sleep affect the appearance *of my skin*

Sleep is the best friend of the whole organism regeneration. It also helps to keep our skin in good condition for many years. Everyone sleeps almost 30% of their lives. We need sleep more than food - we can survive longer without food than without sleep.

Our body naturally produces melatonin - known as the sleep hormone, which coordinates our circadian rhythm. Its highest concentration is at night and the lowest during the day, because light inhibits melatonin production. It is already known that thanks to its specific chemical structure, melatonin has the ability to cross all biological barriers and affect different tissues and cells directly and indirectly. Its key role is focused on improving the quality of sleep and reducing the time it takes for us to fall asleep.

## How does stress impact *my skin*

Chronic stress, along with sleep disturbances, is a killer duo for healthy skin. Long-term stress exposes our skin to disturbed cellular respiration. Produced free radicals destroy collagen and elastin fibres, which leads to loss of elasticity and firmness. Under the influence of stress, the protective function of our water-lipid coat becomes weaker and weaker, skin becomes dull and dry, while blood vessels are dilated.

### ***Effect after 28 days!***

- measurable improvement in smoothness of the skin, on average in the studied group of people was 22% comparing to the initial measurements\*
- the average length of wrinkles has decreased in studied group of people by 18% comparing to the initial measurements\*\*

*\* Tests with the use of equipment were carried out before starting the application of the tested serum and after 4 weeks of its regular use using the Visioscan VC 98 camera.*

*\*\*Measurement of the length and depth of wrinkles was performed using a method of silicone replicas ø 30 mm and with the use of VISIOLINE VL650*

*Visible skin brightening after just  
14 days of treatment!*

## EACH DROP FULL OF POWER AND SHINE

### **DOUBLE C GLOW SKIN DROPS / 30 ml**

Each drop of our serum has a power from two vitamins C. *VC-IPerfection Skin* due to its structure is one of the most stable and effective forms of vitamin C. Its unique structure allows for excellent absorption through the skin, where it is transformed into active form thanks to enzymes. It is stable at higher temperatures and when exposed to light. Kakadu plum (in cosmetic: extract) is a wonderful Australian fruit that is a super rich source of vitamin C and polyphenols. It is a strong, fast-acting antioxidant. It influences the collagen and hyaluronic acid production in the skin, reduces redness, helps to reduce discoloration. Makes the skin glowing, bright and smooth.

45,95 EUR 39,95 GBP

## Two sources of vitamin C *and what more*

Additionally, we enriched Glow Skin drops with *troxerutin* to strengthen the skin's vessels, which become more and more fragile with age. As time passes, the skin becomes thinner and the network of capillaries on the cheeks and nose becomes more and more visible. Vessels begin to break easily - from cold, sun, poor care. We have also added checked ingredients from the Express Lifting Mask, which is one of your beloved products: *macadamia oil, vitamin E, panthenol, allantoin, sugar cane squalene*.

## Are Double C Glow skin drops *for me*

This is an excellent product for mature skin, struggling with wrinkles, discoloration and a tendency to their formation. It will be a wonderful cosmetic for sensitive skin prone to inflammation, redness and irritated by cosmetic procedures. Perfect for care of the skin with fragile, cracking vessels. Great for skin with acne scars.

## ***What effects will you notice?***

- reduces discoloration
- reduces the visibility of wrinkles
- gives the skin a healthy look and energizes it
- the skin becomes brightened and radiant
- reduces reactivity and redness
- strengthens the walls of blood vessels, which reduces the number of broken vessels
- improves skin repair properties by affecting collagen synthesis

## SHIMMERING BODY BALM / 100 ml

## BIOFERMENT

main ingredient of the line

*Bull Kelp* algae bioferment was created as a result of fermentation with the help of *Lactobacillus*. Every year, *Bull Kelp* flourishes along the Pacific Coast of North America from Southern California to Aleuta, an island in Alaska. The fermentation process transforms ingredients from an inactive form into a bioactive form which is better absorbed by our skin, and thus more efficiently processes the most valuable ingredients available in algae creating a noble and unique elixir containing numerous antioxidants, vitamins and minerals. After application, it creates a kind of moisturizing compress that brings relief and soothes even the most irritated, chapped skin.
